

FastenMaster Limited Warranty

FastenMaster Deck Frame Coating

FastenMaster® warrants its Deck Frame Coating for the life of the project. When used in accordance with the installation instructions and within the limitations stated in the supporting technical literature, the long-term performance of this product is covered under the terms of this limited warranty.

What is covered:

When properly handled, stored, and applied in accordance with FastenMaster's published instructions, this limited warranty covers against the peeling, cracking, UV degradation, or adverse reaction of this coating with decking and fasteners. This coverage includes preservative treated exterior wood applications with the following exceptions:

- Coating applied over wood surfaces contaminated with dirt, mildew, or mold.
- Application while temperatures fall below 35 degrees.
- Direct contact with solvents or solvent-type adhesives.

Best Practices:

For maximum performance, the installer should follow directions on the packaging including the following steps:

- Stir coating for 3 minutes after opening to fully mix contents prior to application.
- Allow wood surface to dry before applying. Wood should not be wet to the touch.
- Use a 3/8" nap roller with sufficient coating to easily cover the wood section without thinning.
- Avoid spreading coating until roller runs out as this may degrade roller and leave thinner coverage.
- Coating should remain dry for 12 or more hours to cure properly. Delay applying if rain forecasted within this period.

This structural warranty provides for the full replacement of FastenMaster product when installed within our written installation instructions and recommendations, and where the coating failed to perform, either during installation or over the life of the project.

Claims shall be made within 60 days of discovery in writing to <https://www.fastenmaster.com/support.html> or by contacting FastenMaster Technical Support at 1-800-518-3569. Where claims are the result of installation difficulties not brought to the attention of FastenMaster for remedy or mitigation during installation, this warranty will not apply. The claim process may require proof-of-purchase, a detailed description of the application and failure type, and pictures of the problem areas.

This warranty covers only the cost of the FastenMaster product affected. Building materials such as decking, framing and accessories and the labor to remove or replace affected product are not covered under this warranty.
