

EVO Joist to Ledger

Deck Framing Connector

Frame Decks Faster!

The FastenMaster EVO Joist to Ledger Deck Framing Connector is a faster, easier, code-compliant method for attaching 2x8 or 2x10 pressure treated deck joists to a ledger board.

Product Features:

Time Saving Design

Tabs align joist to ledger in seconds. Eliminates the need to tack joist in place.

Reinforced Engineered Polymer

Stronger than traditional steel connectors. Guaranteed for life of the project.

Professional Exterior Grade

Won't rust. Temperature and UV Resistant.

Code-Compliant

Meets IRC requirements for deck joist hangers. Supported by ICC-ES Evaluation Report (ESR-4711)

Adjustable connectors work with both 2x8 or 2x10 Joists

FastenMaster.

Installation Steps

WARNING: All connector hole locations must be filled with proper screws for safe and correct installation.

DECK JOISTS SHOULD NOT BE STEPPED ON OR LOADED before all screws are installed into the connector.

Failure to follow these steps could result in serious injury or death. Performance and corrosion resistance guaranteed for life of the project when used in accordance installation instructions. Compliance audited by the ICC-ES.
